Subject: ASPECT Flights 04 December

Evening everyone,

ASPECT flew two missions Wednesday 04 December 2019. We had no detections on either the morning or afternoon flights as well as no sheen on the waterway leading to the Neches River.

Today's flight line data and photos are being uploaded to the ftp site. We are working backwards to re-populate the ftp site with the previous days flights. My folks are doing double duty this week with sensor equipment installs and training, so I appreciate your patience.

A draft report with more information on today's flights will follow shortly.

Let me know if you have any questions.

Ahmed
